OFFICIAL VENDORS

PHOs are out and high stability oils are in! As new fats and oils become prominent in the food supply, how will they impact human health? Learn from leading USDA researcher Dr. David Baer as he shares the latest clinical research that seeks to answer that question. [Learn more and register today.](#)

Journal of Food Science Special Supplement: Collaborating Toward Interoperable Full-Chain Food Traceability

The area of food traceability has made significant progress in recent years. From executing targeted recalls to preventing food waste, traceability is viewed as an essential pre-requisite to better supply chain management. Several food sectors, from produce to meat and poultry, have elevated the importance of traceability and begun to implement interoperability within their supply chains. This supplement takes a critical look at recent research and development in seafood traceability. [Learn more.](#)

IFT Online Courses

IFT online courses, including the popular [Food Science for Non-Food Scientist](#) course, are a great way to get up to speed in the science of food. IFT's new [Introduction to Dairy Science](#) course covers the basics of dairy science and is designed to enhance your knowledge of general food science or provide a pathway for those interested in learning more about the field of dairy foods. [Learn more and register for online courses.](#)

Last Chance to Earn Your Certified Food Scientist (CFS) Credential in 2017
